

# SELF-SEALING STACKING BAGS

Is it possible to eliminate cassettes in smart safes and note recyclers? At CIMA, we have an entire range that does just that.

## TAMPER-EVIDENT BAG

With cassettes, notes end up in bags anyway. However, they need to be moved one bundle at a time! CIMA machines bag notes right inside the machine. Notes come out already bagged and sealed.

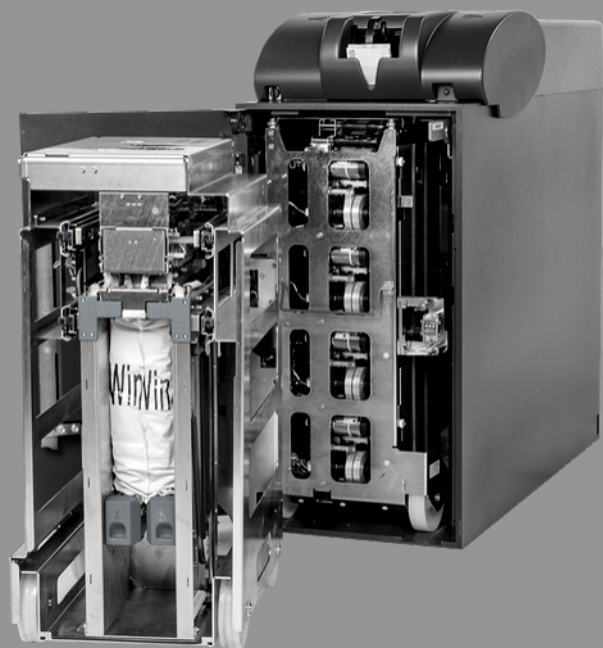

## EASY REPLACEMENT OF BAGS

Customers can remove and replace bags themselves...CIT can pickup multiple bags.

## FASTER CIT PICKUP

Pickup is faster, less time on-site, much easier to process at depot.

## BAGS ARE MORE SECURE

Cash is not exposed onsite...cassettes reveal the cash to the world.
